Summary

CS undergraduate with hands-on experience across full-stack web, mobile, and machine learning — from a React Native contest tracker to an ML-powered agricultural platform. Authored research presented at SNU and PSIT. Active competitive programmer with ratings across LeetCode, Codeforces, and CodeChef.

Education

Noida Institute of Engineering and Technology, Greater Noida 2023–2027

Bachelor of Technology — Computer Science and Business Systems

Current CGPA: 9.11/ 10

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Wisdom Public School, Aligarh 2021–2023

Class 12th (CBSE) — Percentage: 89.8%

Wisdom Public School, Aligarh 2019–2021

Class 10th (CBSE) — Percentage: 81.83%

Experience

Virtual Training Program — IBM SkillsBuild Jun 2024 – Aug 2024

Completed structured online training covering software development practices, cloud fundamentals, and real-world problem solving.

Freelance Web Developer Sep 2025

Designed and deployed a fully responsive website for a bhajan group, improving online visibility with optimized load times and accessible UI.

Projects

ConvoMetrics — Messaging Analytics Tool *Python, Streamlit, NumPy*

Built a Streamlit web app to analyze Social Media chat exports, surfacing message frequency, active hours, and word trends with interactive visualizations. Grew to 2,000+ users and 50+ GitHub stars organically — no marketing, purely word-of-mouth and organic search.

Krono — Competitive Programming Tracker *React Native, Expo, Zustand*

Built a cross-platform React Native app that aggregates upcoming contests from Codeforces, LeetCode, AtCoder, and CodeChef into a single feed with smart reminders and live profile stat tracking. Implemented Zustand for lightweight global state, dark/light theming, and offline caching — resulting in a smooth experience with no loading flicker between screens.

KhetSetu — Smart Agricultural Platform *MERN Stack, scikit-learn, OpenWeather API*

Engineered a full-stack MERN platform that recommends crops to farmers using a Random Forest model trained on soil, rainfall, and temperature data, integrated with live OpenWeather and market price APIs. Designed the decision flow specifically for low-tech-literacy users; model achieved 87% accuracy on held-out test data.

Certifications

- Network Security — Cisco Networking Academy
- Algorithmic Thinking (Part 1 & Part 2) — Coursera

Skills

Languages: Python, C/C++, JavaScript, TypeScript
Web & Mobile: MERN Stack (MongoDB, Express, React, Node.js), React Native, Expo, REST APIs
Tools & Libraries: Pandas, Streamlit, Git, Matplotlib, Zustand
Core CS: Data Structures and Algorithms, OOP, Problem Solving

Co-Curricular Activities

- Presented research papers at SNU (Greater Noida) and PSIT (Kanpur)
- Participated in Smart India Hackathon (SIH) 2024 and 2025
- Knight on LeetCode, Expert on Codeforces, 4-star on CodeChef,
