Meet Thakur

Greater Noida, India | +91 97600 60211 | meet11india@gmail.com | linkedin.com/in/MeetThakur | github.com/MeetThakur | meeeet.dev

Summary

Computer Science undergraduate (CGPA 9.12/10) who takes end-to-end ownership: as an Engineering Intern at Eightfold AI, independently designing and building an in-house Salesforce backup-and-restore pipeline on Databricks to replace a proprietary vendor tool. Proficient in Python, C, and C++ with solid OOP fundamentals. Ships full-stack products solo – design through deployment – from a chat analytics tool used by 2,000+ people to an AI advisory platform and a mobile app. Codeforces Expert with two conference paper presentations.

Experience

Engineering Intern | Eightfold AI | Aug 2026 - Present

- Independently designing and building an in-house Salesforce backup and restore pipeline that recovers records from snapshots held in Databricks, replacing a licensed proprietary vendor tool and eliminating its recurring cost.
- Reverse-engineering the vendor tool's restore behavior to reach feature parity, then extending it with configurable object and field mappings tailored to internal Salesforce and Databricks data flows.
- Preserving parent and child record relationships on restore, and handling Salesforce API limits, batching, and partial failures with retry logic so a run can be resumed without duplicating records.

Freelance Web Developer | Self-employed | Sep 2025

- Shipped a responsive production website end to end for a paying client, covering build, domain setup, and deployment pipeline, with no post-launch defects reported.
- Cut asset payload and improved load times via image and bundle optimization; wrote handoff docs so the client could manage content independently.

Projects

Krono: Cross-Platform Competitive Programming Tracker React Native, Expo, TypeScript, Zustand, SQLite

- Aggregates live contest schedules and profiles from the Codeforces, LeetCode, AtCoder, and CodeChef APIs, with graceful error handling, retries, and timezone-adjusted views.
- Designed the SQLite schema and wrote read, write, and migration queries for local persistence of profiles, rivals, and contest history across 6 released versions.
- Owned the product end to end, shipping a release APK with a rivals leaderboard, background rating sync, and push reminders. Repo: github.com/MeetThakur/Krono

ConvoMetrics: Chat Analytics and Data Pipeline Tool Python, Pandas, Streamlit, Plotly, NLTK

- Parses exported Telegram (JSON) and WhatsApp (TXT) chats into cleaned Pandas DataFrames, computing message counts, hourly activity heatmaps, response trends, and per-user emoji breakdowns.
- Applies NLTK stopword filtering to surface meaningful word trends, visualized as Plotly charts and word clouds in an interactive Streamlit dashboard.
- Earned 59 stars and 11 forks organically and serves 2,000+ users as a live public app. Repo: github.com/MeetThakur/ConvoMetrics

KhetSetu: AI-Powered Agricultural Advisory Platform React, TypeScript, Node.js, Express, PostgreSQL, Gemini API

- Designed and built the full stack solo (frontend, REST API, database schema, deployment) to give Indian farmers advisory guidance through natural-language queries.
- Integrated the Gemini 2.5 Flash API and designed the prompt pipeline to turn varied, incomplete farmer questions into context-aware, actionable answers.
- Modeled the PostgreSQL schema for user profiles, query history, and crop advisory data; deployed the React frontend on Vercel and the Node.js/Express backend on Render with environment-based config.

Skills

Languages: Python, C, C++, SQL, TypeScript, JavaScript, Object-Oriented Programming (OOP)

Databases and Data: PostgreSQL, SQLite, SQL (SELECT, JOIN, GROUP BY, subqueries, window functions), Pandas, NumPy, Databricks, ETL pipelines, Plotly, Matplotlib

Web and Mobile: React, Node.js, Express, PERN stack, React Native, Expo, Streamlit, REST APIs

Tools and Practices: Git, GitHub (branching, pull requests, peer review), software design and testing, deployment (Vercel, Render), Salesforce APIs, JSON, YAML, Linux

Education

B.Tech, Computer Science and Business Systems | Noida Institute of Engineering and Technology, Greater Noida | 2023 - 2027

CGPA: 9.12/10 | Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Wisdom Public School, Aligarh | 2019 - 2023 | Class 12 (CBSE): 89.8% | Class 10 (CBSE): 81.83%

Certifications

Network Security, Cisco | Algorithmic Thinking Part 1 and Part 2, Coursera

Achievements

Competitive Programming: Expert on Codeforces, Knight on LeetCode (top 4%), 4-star on CodeChef.

Research and Hackathons: Papers presented at Shiv Nadar University and PSIT Kanpur; Smart India Hackathon 2024 and 2025.
